Chapter 2 Globalization of Markets and the Internationalization of the Firm

1) Which of the following is characteristic of globalization of markets?

- A) lack of skilled labor
- B) conservatism
- C) declining trade barriers
- D) diminishing gap between the rich and the poor

Answer: C

Diff: 1: Easy

Skill: Concept

Objective: 2-1: Understand market globalization as an organizing framework

AACSB: Application of Knowledge

2) The first phase of globalization was characterized by the _____.

- A) rise of steel production
- B) rise of SMEs
- C) dominance of MNEs in the agricultural industry
- D) growth of railroads

Answer: D

Diff: 1: Easy

Skill: Concept

Objective: 2-1: Understand market globalization as an organizing framework

AACSB: Application of Knowledge

3) The _____ phase of globalization began around 1900 and was associated with the rise of electricity and steel production.

- A) first
- B) second
- C) third
- D) fourth

Answer: B

Diff: 1: Easy

Skill: Concept

Objective: 2-1: Understand market globalization as an organizing framework

AACSB: Application of Knowledge

4) The third phase of globalization was triggered by _____.

- A) the end of World War II
- B) the invention of electricity
- C) the end of World War I
- D) the Great Depression

Answer: A

Diff: 1: Easy

Skill: Concept

Objective: 2-1: Understand market globalization as an organizing framework

AACSB: Application of Knowledge

5) Which of the following reflects the major contribution of GATT to globalization?

- A) It instituted strict controls on international currencies.
- B) It simplified patent and copyright laws.
- C) It reduced barriers to international trade and investment.
- D) It eliminated the divide between the rich and the poor.

Answer: C

Diff: 1: Easy

Skill: Concept

Objective: 2-1: Understand market globalization as an organizing framework

AACSB: Application of Knowledge

6) The fourth phase of globalization is characterized by _____.

- A) the rise of railroads and ocean transport
- B) the reduction of barriers to trade by Western industrialized countries
- C) the initiation of the Marshall Plan to reconstruct Europe
- D) the enormous growth of cross-border trade and investment

Answer: D

Diff: 1: Easy

Skill: Concept

Objective: 2-1: Understand market globalization as an organizing framework

AACSB: Application of Knowledge

Internationalization Conference (Scenario)

At a conference on business internationalization strategies, representatives of three different businesses meet to discuss a joint venture between their companies. Business A is located in a country that internationalized during the second phase of globalization. Business B is based in a country that internationalized during the third phase of globalization. Business C is located in an emerging market country.

7) The representative from Business A is most likely from _____.

- A) China
- B) United Kingdom
- C) Mexico
- D) Brazil

Answer: B

Diff: 2: Moderate

Skill: Application

Objective: 2-1: Understand market globalization as an organizing framework

AACSB: Analytical Thinking

8) The representative from Business B is most likely from _____.

- A) Panama
- B) Hungary
- C) Uganda
- D) Japan

Answer: D

Diff: 2: Moderate

Skill: Application

Objective: 2-1: Understand market globalization as an organizing framework

AACSB: Analytical Thinking

9) The representative from Business C is most likely from _____.

- A) Italy
- B) Brazil
- C) the United States
- D) France

Answer: B

Diff: 2: Moderate

Skill: Application

Objective: 2-1: Understand market globalization as an organizing framework

AACSB: Analytical Thinking

10) Over time, the GATT evolved into the _____.

- A) World Bank
- B) International Monetary Fund
- C) World Trade Organization
- D) World Intellectual Property Organization

Answer: C

Diff: 1: Easy

Skill: Concept

Objective: 2-1: Understand market globalization as an organizing framework

AACSB: Application of Knowledge

11) Early multinationals from the third phase of globalization originated in _____.

- A) Japan
- B) China
- C) India
- D) Brazil

Answer: A

Diff: 1: Easy

Skill: Concept

Objective: 2-1: Understand market globalization as an organizing framework

AACSB: Application of Knowledge

12) The fourth phase of globalization _____.

- A) is characterized by the rise of electricity and steel production
- B) is characterized by the rise of MNEs from Japan
- C) witnessed the Bretton Woods Conference of twenty-three nations in 1947 that led to the General Agreement on Tariffs and Trade
- D) facilitated the globalization of the service sector in such areas as banking and retailing

Answer: D

Diff: 1: Easy

Skill: Concept

Objective: 2-1: Understand market globalization as an organizing framework

AACSB: Application of Knowledge

13) As market globalization intensifies, _____.

- A) the gap between the rich and the poor shrinks rapidly
- B) the distance between consumers worldwide expands
- C) individual firms respond to the challenges and new advantages that it brings
- D) firms internationalize solely as a reaction to it

Answer: C

Diff: 1: Easy

Skill: Concept

Objective: 2-1: Understand market globalization as an organizing framework

AACSB: Application of Knowledge

14) Which of the following is a driver of globalization?

- A) greater emphasis on proactive internationalization
- B) internationalization of firm's value chain
- C) integration of world financial markets
- D) globalization of services

Answer: C

Diff: 1: Easy

Skill: Concept

Objective: 2-1: Understand market globalization as an organizing framework

AACSB: Application of Knowledge

15) Which of the following is a societal consequence of market globalization?

- A) greater emphasis on proactive internationalization
- B) internationalization of firm's value chain
- C) new risks and instant rivalry from foreign competitors
- D) offshoring and the flight of jobs

Answer: D

Diff: 1: Easy

Skill: Concept

Objective: 2-1: Understand market globalization as an organizing framework

AACSB: Analytical Thinking

16) Firms that are more successful at global competition display each of the following qualities EXCEPT _____.

- A) identifying foreign market opportunities aggressively
- B) approaching internationalization from a reactive standpoint
- C) actively pursuing partnerships with foreign firms
- D) focusing intensively on building organizational capacities

Answer: B

Diff: 1: Easy

Skill: Concept

Objective: 2-1: Understand market globalization as an organizing framework

AACSB: Application of Knowledge

Global Operations Report (Scenario)

As Vice President of Global Expansion for Pax Telecom, Deva Mikiri is tasked with preparing a comprehensive report on the company's global operations over the past 20 years. Deva assigns three strategists to collaborate on the History portion of the report, which details the rationale behind Pax's decisions to expand operations in particular areas. Rashid Ahl focuses on early expansion to China, which occurred after China began to make its market more accessible to foreign companies. Markus Teller focuses on Pax's expansion to Eastern Europe, which was motivated by increased industry privatization in key countries. Lavonne Jackson focuses on expansion to Japan, which happened when the company's commercial bank expanded its service network to Asia.

17) To which of the following drivers of market globalization is Markus most likely to attribute his company's expansion to Eastern Europe?

- A) advances in technology
- B) integration of world financial markets
- C) market liberalization
- D) industrialization

Answer: C

Diff: 2: Moderate

Skill: Application

Objective: 2-1: Understand market globalization as an organizing framework

AACSB: Analytical Thinking

18) Nationalization refers to the gradual integration and growing interdependence of national economies.

Answer: FALSE

Diff: 1: Easy

Skill: Concept

Objective: 2-1: Understand market globalization as an organizing framework

AACSB: Application of Knowledge

19) The initial phase of globalization was triggered by the introduction of the railroads and ocean transport.

Answer: TRUE

Diff: 1: Easy

Skill: Concept

Objective: 2-1: Understand market globalization as an organizing framework

AACSB: Application of Knowledge

20) The Great Depression marked the beginning of the second phase of globalization.

Answer: FALSE

Diff: 1: Easy

Skill: Concept

Objective: 2-1: Understand market globalization as an organizing framework

AACSB: Application of Knowledge

21) The third phase of globalization was triggered by the development of personal computers, the Internet, and Web browsers.

Answer: FALSE

Diff: 1: Easy

Skill: Concept

Objective: 2-1: Understand market globalization as an organizing framework

AACSB: Application of Knowledge

22) Firms expand abroad mainly as a reaction to market globalization.

Answer: FALSE

Diff: 1: Easy

Skill: Concept

Objective: 2-1: Understand market globalization as an organizing framework

AACSB: Application of Knowledge

23) Firms often internationalize proactively in order to pursue new markets, find lower-cost inputs, or obtain other advantages.

Answer: TRUE

Diff: 1: Easy

Skill: Concept

Objective: 2-1: Understand market globalization as an organizing framework

AACSB: Application of Knowledge

24) Offshoring and the flight of jobs are prime drivers of market globalization.

Answer: FALSE

Diff: 1: Easy

Skill: Concept

Objective: 2-1: Understand market globalization as an organizing framework

AACSB: Application of Knowledge

25) Globalization of production activities and services is a dimension of market globalization.

Answer: TRUE

Diff: 1: Easy

Skill: Concept

Objective: 2-1: Understand market globalization as an organizing framework

AACSB: Application of Knowledge

26) Describe the role of GATT and the WTO in reducing barriers to trade and investment worldwide, and explain how this reduction has led to the integration and interdependence of national economies.

Answer: The Bretton Woods Conference of 23 nations in 1947 led to the General Agreement on Tariffs and Trade (GATT) and a series of negotiations that, over time, reduced barriers to international trade and investment. Participating governments recognized that liberalized trade would stimulate industrialization, modernization, and better living standards. The GATT eventually transformed into the World Trade Organization, a multilateral governing body that grew to include 149 member nations. The WTO aims to regulate and ensure fairness and efficiency in global trade and investment. Global cooperation in the postwar era gave birth to other international organizations such as the International Monetary Fund and the World Bank.

Internationally active firms devise multi-country operations through trade, investment, geographic dispersal of company resources, and integration and coordination of value-chain activities. Governments have facilitated this integration by lowering barriers to international trade and investment, harmonizing their monetary and fiscal policies within regional economic integration blocs (also known as trade blocs), and developing supranational institutions—the World Bank, International Monetary Fund, World Trade Organization, and others—that seek further reductions in trade and investment barriers.

Diff: 2: Moderate

Skill: Synthesis; Critical Thinking

Objective: 2-1: Understand market globalization as an organizing framework

AACSB: Application of Knowledge

27) Describe the fourth phase of globalization. What is contagion?

Answer: The fourth phase of globalization began in the early 1980s. This phase featured enormous growth in cross-border trade and investment. It was triggered by the development of personal computers, the Internet, and Web browsers. It was also characterized by the collapse of the Soviet Union and the market liberalization of Central and Eastern Europe. Impressive industrialization and modernization in East Asian economies followed. International prosperity began to develop in the emerging markets including Brazil, India, and Mexico.

Contagion refers to the tendency of a financial or monetary crisis in one country to spread rapidly to other countries, due to the ongoing integration of national economies. Starting in 2008, the world economy experienced a severe financial crisis and global recession, the worst in decades. The crisis began in the United States and, like a contagious disease, spread around the world.

Diff: 2: Moderate

Skill: Synthesis

Objective: 2-1: Understand market globalization as an organizing framework

AACSB: Application of Knowledge

28) Financial market integration makes it easier for internationally active firms to _____.

A) nationalize manufacturing industries

B) minimize offshoring

C) increase tariffs on the import of automobiles and industrial machinery

D) engage in foreign currency transactions

Answer: D

Diff: 1: Easy

Skill: Concept

Objective: 2-1, 2-2: Understand market globalization as an organizing framework, Learn the driving forces of globalization

AACSB: Application of Knowledge

Global Operations Report (Scenario)

As Vice President of Global Expansion for Pax Telecom, Deva Mikiri is tasked with preparing a comprehensive report on the company's global operations over the past 20 years. Deva assigns three strategists to collaborate on the History portion of the report, which details the rationale behind Pax's decisions to expand operations in particular areas. Rashid Ahl focuses on early expansion to China, which occurred after China began to make its market more accessible to foreign companies. Markus Teller focuses on Pax's expansion to Eastern Europe, which was motivated by increased industry privatization in key countries. Lavonne Jackson focuses on expansion to Japan, which happened when the company's commercial bank expanded its service network to Asia.

29) In describing the main driver behind Pax's expansion to China, Rashid is most likely to emphasize _____.

- A) the high rate of employee attrition in China
- B) advances in technology
- C) reduction of barriers to trade
- D) integration of world financial markets

Answer: C

Diff: 2: Moderate

Skill: Concept

Objective: 2-2: Learn the driving forces of globalization

AACSB: Analytical Thinking

30) Which of the following drivers of market globalization is Lavonne's research most likely to recognize as the factor responsible for the company's expansion to Japan?

- A) integration of world financial markets
- B) the highly conservative nature of the Japanese economy
- C) the rise of monopoly markets in Japan
- D) reduction of barriers to investment

Answer: A

Diff: 2: Moderate

Skill: Concept

Objective: 2-2: Learn the driving forces of globalization

AACSB: Analytical Thinking

31) _____ marked the end of the 50-year Cold War and smoothed the integration of former command economies into the global economy.

- A) The end of World War II
- B) The Bolshevik Revolution in Russia
- C) Free-market reforms in China and the former Soviet Union
- D) China's move to join the WTO

Answer: C

Diff: 1: Easy

Skill: Concept

Objective: 2-2: Learn the driving forces of globalization

AACSB: Application of Knowledge

32) The globalization of finance _____.

- A) enables companies to minimize offshoring
- B) contributes to firms' abilities to develop and operate world-scale production and marketing
- C) discourages innovation
- D) discourages free international exchange of goods and services

Answer: B

Diff: 1: Easy

Skill: Concept

Objective: 2-2: Learn the driving forces of globalization

AACSB: Application of Knowledge

33) Firms are sometimes motivated to enter new markets because of unfavorable conditions in the home market, such as regulation or declining local industry sales.

Answer: TRUE

Diff: 1: Easy

Skill: Concept

Objective: 2-2: Learn the driving forces of globalization

AACSB: Application of Knowledge

34) Falling trade barriers are facilitated by the WTO.

Answer: TRUE

Diff: 1: Easy

Skill: Concept

AACSB: Application of Knowledge

35) The end of the Cold War in 1989 hindered the forces of market liberalization in Eastern Europe.

Answer: FALSE

Diff: 1: Easy

Skill: Concept

Objective: 2-2: Learn the driving forces of globalization

AACSB: Application of Knowledge

36) Industrialization implies that emerging markets are increasing their dependence on low-cost labor.

Answer: FALSE

Diff: 1: Easy

Skill: Concept

Objective: 2-2: Learn the driving forces of globalization

AACSB: Application of Knowledge

37) How has the adoption of free markets worldwide served as a driver of market globalization? Provide three examples to support your answer.

Answer: In the past three decades, free-market reforms have smoothed the integration of China, India, Russia, and other formerly protectionist countries into the global economy. Numerous Asian economies—for example, India, Indonesia, Malaysia, and South Korea—embraced free market norms. These events opened much of the world to freer international trade and investment. China, India, and Eastern Europe have become some of the most cost-effective locations for producing goods and services worldwide. Privatization of previously state-owned industries in these countries has encouraged economic efficiency and attracted massive foreign capital to their national economies.

Diff: 2: Moderate

Skill: Concept

Objective: 2-2: Learn the driving forces of globalization

AACSB: Application of Knowledge

38) What is implied by industrialization? How does it bring about economic development?

Answer: Many emerging markets—rapidly developing economies in Asia, Latin America, and Eastern Europe—have now moved from being low value-adding commodity producers to sophisticated, competitive producers and exporters of premium products. These include such products as electronics, computers, and aircraft. For example, Brazil is now a leading manufacturer of Embraer commercial aircraft. The Czech Republic excels in producing automobiles. India is a leading supplier of software. Economic development results in increased incomes and living standards. Perhaps the most important measure of economic development is gross national income (GNI) per head. Africa and several countries in Asia and Latin America are the lowest-income countries. These areas are also characterized by lower levels of globalization. A critical driver of rising income levels is the nation's volume of international trade.

Diff: 2: Moderate

Skill: Concept

Objective: 2-2: Learn the driving forces of globalization

AACSB: Application of Knowledge

39) What is meant by the internationalization of a firm's value chain?

Answer: The most direct consequence of market globalization is on the firm's value chain. Globalization compels firms to organize their sourcing, manufacturing, marketing, and other value-adding activities on a global scale to achieve cost advantages and time efficiencies. In a typical value chain, the firm conducts research and product development (R&D), purchases production inputs, and assembles or manufactures a product or service. Next, the firm performs marketing activities such as pricing, promotion, and selling, followed by distribution of the product in targeted markets and after-sales service.

The value-chain concept is useful in international business because it helps clarify what activities are performed where in the world. For example, exporting firms perform most "upstream" value-chain activities (R&D and production) in the home market and most "downstream" activities (marketing and after-sales service) abroad. Each value-adding activity in the firm's value chain is subject to internationalization. That is, it can be performed in locations outside the home country. The most typical reasons for locating value-chain activities in particular countries are to reduce the costs of R&D and production or to gain closer access to customers. Through offshoring, the firm relocates a major value-chain activity by establishing a factory or other subsidiary abroad. A related trend is global outsourcing, in which the firm delegates performance of a value-adding activity to an external supplier or contractor located abroad.

Objective: 2-3: Understand the impact of technological advances on globalization

AACSB: Application of Knowledge

51) In a short essay, identify the four areas in which technological advances had their greatest impact on business. Describe the impact of each area on business today.

Answer: Advances in technology, the most important of which have occurred in information technology, digitalization, communications, the Internet, manufacturing, and transportation, are particularly important in driving globalization. These systems help create an interconnected network of customers, suppliers, and intermediaries worldwide and have made the cost of international business affordable for all types of firms.

a. Information technology: Information technology (IT) is the science and process of creating and using information resources. Its effect on business has been revolutionary. The cost of computer processing fell by 30 percent per year during the past two decades and continues to fall. IT creates competitive advantages by giving companies new ways to outperform rivals. IT benefits smaller firms too, allowing them to design and produce customized products they can target to narrow, cross-national market niches.

b. Communications: The Internet, and Internet-dependent systems such as intranets, extranets, social media, and e-mail connect billions of people and companies. Marketers use the Internet to promote the widest range of products and services to customers worldwide. Transmitting voice, data, and images is essentially costless, making Seoul, Stockholm, and San Jose next-door neighbors. South Korea has nearly 100 percent Internet access and is among the fastest broadband networks worldwide. Koreans use their phones to pay bills, do banking, and watch news programs.

c. Manufacturing: Computer-aided design (CAD) of products, robotics, and production lines has transformed manufacturing, mainly by reducing production costs. Revolutionary developments facilitate low-scale and low-cost manufacturing. Firms can make products cost-effectively even in short production runs. Such developments benefit international business by allowing firms to more efficiently adapt products to individual foreign markets, profitably target small national markets, and compete more effectively with foreign competitors that enjoy cost advantages.

d. Transportation: The development of fuel-efficient jumbo jets, giant ocean-going freighters, and new transportation technology have greatly reduced shipping times and costs.

Diff: 2: Moderate

Skill: Concept

Objective: 2-3: Understand the impact of technological advances on globalization

AACSB: Application of Knowledge

67) In a short essay, discuss the impact of market globalization on consumer lifestyles and preferences around the world. Provide examples to illustrate your answer.

Answer: Around the world, consumers spend their money and time in similar ways. Many aspects of lifestyles and preferences are converging. Shoppers in New York, Paris, and Shanghai increasingly demand similar household goods, clothing, automobiles, and electronics. Teenagers everywhere are attracted to iPods, Levi's jeans, and Hollywood movies. Major brands enjoy a global following encouraged by movies, global media, and the Internet. Movies such as *Transformers* and *The Hunger Games* have developed global audiences of fans. Convergence of preferences is also occurring in industrial markets, where professional buyers source raw materials, parts, and components that are increasingly standardized—that is, similar or identical in design and structure.

Acme Software (Scenario)

Acme Software is a U.S.-based maker of software products for the health care industry. Recently Acme has been investigating whether it would be beneficial to internationalize some of its value-chain activities. Acme hires a consulting group to help determine which, if any, value-chain activities could be conducted abroad to promote business growth. The consulting group identifies two health care software development companies in India that could provide programming services at a lower cost than Acme's current expenditures for programming. In addition, the consultants conduct international market research that shows that German health care companies have a strong demand for the type of software that Acme offers.

74) Which of the following activities in Acme's value chain would be internationalized if Acme decides to establish a development contract with one of the Indian software firms?

- A) sales
- B) distribution
- C) marketing
- D) procurement

Answer: D

Globalization Debate (Scenario)

In his international business class, Professor Jang organizes a debate on the societal effects of market globalization. Juan Prince takes a position that highlights the negative effects of market globalization. He emphasizes how multinational enterprises can wield so much influence that they threaten national sovereignty. He also notes the prevalence of low wages and sweatshop conditions as firms utilize low-cost labor abroad. Juan then describes the detrimental effects of corporate pollution on the environment, and he ends his argument by explaining how market globalization helps homogenize national cultures. Rina Taylor is assigned to counter Juan's position.

85) Which of the following is Rina most likely to cite as a counter example to Juan's argument regarding the influence of MNEs on national sovereignty?

- A) the dominating influence of market forces on the global economy
- B) technological advances in computer-aided design of products
- C) the political influence of large firms such as Walmart
- D) the actual GDPs of underdeveloped economies

Answer: A

Diff: 2: Moderate

Objective: 2-6: Understand the societal consequences of globalization

AACSB: Diverse and Multicultural Work Environments

96) In a short essay, explain the concept of sovereignty. How does globalization affect sovereignty?

Answer: Sovereignty is defined as the ability of a nation to govern its own affairs. One country's laws cannot be applied or enforced in another country. Globalization can threaten national sovereignty in various ways. MNE activities can interfere with a government's ability to control its own economy, social structure, and political system. Some corporations are bigger than the economies of small nations. Walmart's internal economy—its total revenues—is larger than the GDP of many of the world's nations, including Israel, Greece, and Poland. Large multinational firms can apply a lot of pressure on governments through lobbying or campaign contributions. MNEs frequently influence the legislative process. Corporate dominance of individual markets is rare. In reality, market forces generally dominate companies. For example, Ford, Chrysler, and General Motors once dominated the U.S. auto market. Today many more automotive firms compete in the United States. These include Toyota, Honda, Hyundai, Nissan, and BMW. Toyota now leads the global market in annual sales. Home-country market shares of domestic U.S. automakers have tumbled. To minimize globalization's harm and reap its benefits, governments should ensure the freedom to enter and compete in markets, protect private property, enforce the law, and support voluntary exchange through markets rather than through political processes. Banks and financial institutions should be regulated appropriately. Transparency in the affairs of business and regulatory agencies is critical.

Diff: 2: Moderate

Skill: Concept

AACSB: Application of Knowledge

97) Discuss the effect of globalization on national culture.

Answer: Globalization exerts strong pressures on national culture. Market liberalization exposes local consumers to global brands, unfamiliar products, and different values. People worldwide are exposed to movies, television, the Internet, and other information sources that promote lifestyles of people in the United States and other advanced economies. Appetites grow for Western products and services, which are seen to signal higher living standards. For example, despite low per-capita income, many Chinese buy consumer electronics such as cell phones and TV sets. Advertising disseminates societal values modeled on Western countries. Hollywood dominates the global entertainment industry.

The flow of cultural influence often goes both ways, too. Cafe Spice is an Indian food company whose founder hails from Mumbai. The firm is transforming American tastes by selling curry dishes and other Indian favorites in cafeterias and supermarkets. Cafe Spice is helping to make Indian cuisine mainstream in the United States. As the influence of the Chinese economy grows over time, Western countries will likely adopt some of China's cultural attitudes and behaviors. Chinese restaurants and some Chinese traditions are already a way of life in much of the world. Similar influences are evident from Latin America and other areas in the developing world.

Cultural imperialism is offset by the countertrend of local nationalism. Although many products and services have become largely universal, people's behaviors and attitudes remain relatively stable over time. Religious differences are as strong as ever. Language differences are steadfast across national borders. As globalization standardizes superficial aspects of life across national cultures, people resist these forces by insisting on their national identity and taking steps to protect it. For example, laws exist to protect national language and culture in Belgium, Canada, and France.

AACSB: Diverse and Multicultural Work Environments

98) In a short essay, discuss the impact of globalization on Africa.

Answer: Africa is home to the poorest countries. The majority of its one billion people live on less than \$2 a day. It is the area least integrated into the world economy and accounts for less than 3 percent of world trade. Although it has abundant natural resources, Africa remains underdeveloped due to many factors including an inadequate commercial infrastructure, lack of access to foreign capital, high illiteracy, government corruption, wars, and the spread of AIDS. One of the most effective ways to alleviate African poverty is to develop more business-based models of development. Several sub-Saharan African countries have recently experienced significant economic growth by increasing international trade in commodities. Africa is a major supplier of petroleum to Europe and the United States. Angola is among the top oil suppliers to China. This activity has developed a ripple effect of economic development. As a result of the boom of certain sectors in Africa, there has been an increase in foreign banks, retailers, and MNEs operations in the continent. Rwanda had developed business opportunities in sectors as diverse as mining, tourism, telecommunications, and real estate. China and India are beating out U.S. firms and quickly increasing their business dealings in Africa. Chinese companies are investing billions of dollars in the continent. International trade and investment are helping to address many of Africa's most pressing development needs. Samsung has set a goal of \$10 billion in African sales and is committed to training 10,000 African engineers and technicians to develop the capabilities needed for success. It will take many more years before Africa achieves a critical mass of infrastructure and business culture sufficient to substantially raise average incomes across the continent.
