ESSAY

141 : Ordinarily life insurance proceeds are excluded from gross income. Why would they be taxable if the policy had been transferred for valuable consideration, prior to the death of the insured?

investment for the new owner. Generally, the excess of the amount realized on disposal of an investment over the cost of the investment is subject to taxation.

142 : During the current year, Margaret and John received \$24,000 in Social Security benefits. The amount of their adjusted gross income for the year before any Social Security income was \$140,000 and they received \$19,000 in tax-exempt income. Explain the treatment of their Social Security income for tax purposes and the likely percentage of the Social Security income that will be taxable to Margaret and John.

Correct Answer : Social Security income is partially taxed based on the taxpayer's modified adjusted gross income. Modified adjusted gross income includes adjusted gross income plus tax exempt interest plus half of the Social Security received. For low income taxpayers, no Social Security income is taxable. Higher income taxpayers must include 50 to 85 percent of the Social Security receipts in income. Given the high level of income reported by Margaret and John, it is safe to say they would have to include 85 percent of the Social Security payments in taxable income. To be certain, the IRS Social Security worksheet should be used to calculate the taxable amount.
