TEST BANK FOR INVESTMENTS ANALYSIS AND MANAGEMENT 14TH EDITION JONES ISBN 9781119578079

Chapter 2: Investment Alternatives

Multiple Choice Questions

- 1. The largest single institutional owner of common stocks is:
- a. mutual funds.
- b. insurance companies.
- c. pension funds.
- d. commercial banks.

Ans: c

Difficulty: Moderate

Ref: Organizing Financial Assets

- 2. Which of the following is not a characteristic of the primary nonmarketable financial asset owned by most individuals?
- a. High liquidity
- b. High return
- c. Often issued by the U.S. government
- d. Low risk

Ans: b

Difficulty: Moderate

Ref: Nonmarketable Financial Assets

- 3. Savings accounts are:
- a. negotiable but are not liquid.
- b. marketable but are not liquid.
- c. liquid but are not personal.
- d. liquid but are not marketable.

Ans: d

Difficulty: Difficult

Ref: Nonmarketable Financial Assets

- 4. Nonmarketable financial assets that protect against inflation include:
- a. nonnegotiable certificates of deposit (CDs).
- b. money market deposit accounts (MMDAs).
- c. Series EE US government savings bonds.
- d. US government savings bonds, I bonds.

Ans: d

Difficulty: Moderate

Ref: Nonmarketable Financial Assets

- 5. Treasury bills are traded in the:
- a. money market.
- b. capital market.
- c. government market.
- d. regulated market.

Ans: a

Difficulty: Easy

Ref: Money Market Securities

- 6. Which of the U.S. Treasury securities is always sold at a discount?
- a. Treasury bills
- b. Treasury notes
- c. Treasury bonds
- d. Treasury inflation protected securities (TIPS)

Ans: a

Difficulty: Moderate

Ref: Money Market Securities

- 7. Which of the following statements regarding money market instruments is *not* true?
- a. They tend to be highly marketable.
- b. They have maturities from 1 to 3 years.
- c. They tend to have a low probability of default.
- d. Their rates tend to move together.

Ans: b

Difficulty: Moderate

Ref: Money Market Securities

- 8. Which of the following would *not* be considered a capital market security?
- a. A 20-year corporate bond
- b. A common stock
- c. A 6-month Treasury bill
- d. A mutual fund share

Ans: c

Difficulty: Moderate

Ref: Capital Market Securities

- 9. The coupon rate is another name for the:
- a. market interest rate.
- b. current yield.
- c. stated interest rate.
- d. yield to maturity.

Ans: c

Difficulty: Easy

Ref: Fixed-Income Securities

- 10. Zero-coupon bonds are similar to Treasury bills in that both are:
- a. issued exclusively by the U.S. Treasury.
- b. money-market securities.
- c. capital-market securities.
- d. sold on a discount basis.

Ans: d

Difficulty: Moderate

Ref: Fixed-Income Securities

- 11. Each point on a corporate bond quote represents:
- a. \$100.
- b. 1 percent of \$100.
- c. 1 percent of \$1000.
- d. \$1000.

Ans: c

Difficulty: Difficult

Ref: Fixed-Income Securities

- 12. Treasury STRIPS are most similar to which type of corporate security?
- a. Preferred stock
- b. Premium bond
- c. High-yield bond
- d. Zero-coupon bond

Ans: d

Difficulty: Moderate

- 13. Bonds trade on an accrual interest basis. This means an investor:
- a. can sell a bond at any time without losing the interest that has accrued.
- b. can buy a bond at any time and gain the interest accrued from the time of the last payment.
- c. can sell a bond at any time and retain the interest portion of the bond.
- d. can buy a bond at any time and receive an immediate interest check.

Ans: a

Difficulty: Moderate

Ref: Fixed-Income Securities

- 14. Bonds called in are likely to be:
- a. bonds already in default.
- b. replaced with new bonds that have a lower interest rate.
- c. replaced with new bonds that have a higher interest rate.
- d. junk bonds.

Ans: b

Difficulty: Moderate

Ref: Fixed-Income Securities

- 15. What will a bond be worth on the day it matures?
- a. \$0
- b. \$100
- c. Its face value (plus remaining coupon, if applicable)
- d. Its remaining coupon, if applicable

Ans: c

Difficulty: Moderate

Ref: Fixed-Income Securities

- 16. Which of the following statements is true regarding an investment in mortgage-backed securities?
- a. There is little default risk.
- b. The stated maturity is generally 10 years.
- c. They receive a fixed payment per month.
- d. They are not subject to prepayment.

Ans: a

Difficulty: Moderate

- 17. A municipal bond issued to finance a toll bridge would most likely be a:
- a. general obligation bond.
- b. revenue bond.
- c. special assessment bond.
- d. zero-coupon bond.

Ans: b

Difficulty: Easy

Ref: Fixed-Income Securities

- 18. What is the major difference between municipal bonds and other types of bonds?
- a. Municipal bonds are always insured; other bonds are not.
- b. Unlike other bonds, municipal bonds sell at a discount.
- c. Municipal bond interest is tax-exempt; interest on other bonds is not.
- d. There is no brokerage commission on municipal bonds unlike other bonds.

Ans: c

Difficulty: Moderate

Ref: Fixed-Income Securities

- 19. For an investor with a 28% marginal tax rate, what return would a corporate bond have to pay to provide the same after-tax return as a municipal bond paying 5%?
- a. 1.40%
- b. 2.50%
- c. 5.00%
- d. 6.94%

Ans: d

Difficulty: Moderate

Ref: Fixed-Income Securities

- 20. Interest on bonds is typically paid:
- a. monthly.
- b. quarterly.
- c. semi-annually.
- d. annually.

Ans: c

Difficulty: Moderate

- 21. Treasury bonds generally have original maturities of:
- a. 5 to 15 years.
- b. 5 to 30 years.
- c. 10 to 20 years.
- d. 10 to 30 years.

Ans: d

Difficulty: Easy

Ref: Fixed-Income Securities

- 22. A corporate bond with a rating of BBB- is considered to be which of the following?
- a. Non-investment grade
- b. Investment grade
- c. Speculative grade
- d. Junk or high-yield

Ans: b

Difficulty: Difficult

Ref: Fixed-Income Securities

- 23. An unsecured bond is known as a(n):
- a. debenture.
- b. indenture.
- c. mortgage bond.
- d. junk bond.

Ans: a

Difficulty: Moderate

Ref: Fixed-Income Securities

- 24. Which of the following 10-year bonds would have the lowest yield?
- a. AAA-rated corporate bond
- b. AAA-rated insured municipal bond
- c. U.S. Treasury bond
- d. AAA-rated mortgage-backed bond

Ans: b

Difficulty: Difficult

- 25. For U.S. companies, dividends are typically paid:
- a. monthly.
- b. quarterly.
- c. semi-annually.
- d. yearly.

Ans: b

Difficulty: Easy

Ref: Equity Securities

- 26. If an investor states that Intel is overvalued at 20 times, he is referring to Intel's:
- a. earnings per share.
- b. dividend yield.
- c. book value.
- d. P/E ratio.

Ans: d

Difficulty: Difficult Ref: Equity Securities

- 27. Which of the following is a security that represents shares of a foreign company, which are held in a bank?
- a. Convertible bond
- b. American Depository Receipt (ADR)
- c. Asset-backed security
- d. LEAPS

Ans: b

Difficulty: Easy

Ref: Equity Securities

- 28. Which of the following statements regarding common stocks is true?
- a. The par value of common stock is usually \$100.
- b. The market value of common stock is equal to its book value.
- c. Dividends on common stock are at the discretion of the company.
- d. Common stock has a senior claim on company assets.

Ans: c

Difficulty: Moderate Ref: Equity Securities

- 29. If a preferred stock issue is cumulative, this means that unpaid preferred stock dividends:
- are paid at the end of the year. a.
- are legally binding on the corporation. b.
- must be paid in the future before common stock dividends can be paid. c.
- d. are never repaid.

Ans: c

Difficulty: Moderate **Ref: Equity Securities**

- 30. Which of the following statements is true regarding asset-backed securities?
- a. They offer relatively high yields.
- They have relatively long maturities. b.
- They generally have low credit ratings. c.
- d. Each traunche has the same risk.

Ans: a

Difficulty: Moderate

Ref: Asset Backed Securities

- 31. What is the biggest difference between an option and a futures contract?
- Options are traded on exchanges, whereas futures are not. a.
- Options give investors a way to manage portfolio risk, while futures do not. b.
- c. Options can be used by speculators to profit from price fluctuations, while futures cannot.
- d. Options give their holders the right to buy or sell, whereas futures contracts are obligations to buy or sell.

Ans: d

Difficulty: Difficult **Ref: Derivative Securities**

- 32. The premium on an option is the:
- par value of the option. a.
- price of the option. b.
- book value of the option. c.
- price at which a security may be bought or sold using the option. d.

Ans: b

Difficulty: Moderate **Ref: Derivative Securities**

- 33. If a call option has a \$10 strike price, and the underlying stock is trading at \$11, then the option is considered:
- a. in the money.
- b. at the money.
- c. out of the money.
- d. worthless.

Ans: a

Difficulty: Easy

Ref: Derivative Securities

- 34. American Depositary Receipts (ADRs) are attractive investments for U.S. investors because they:
- a. eliminate foreign currency exchange risk.
- b. are purchased on a U.S. exchange with U.S. dollars.
- c. pay dividends that are exempt from income taxes.
- d. are less risky than the typical U.S. stock.

Ans: b

Difficulty: Moderate

Ref: Investing Globally in Equities

- 35. Which of the following is a capital market, fixed-income security?
- a. An American Depository Receipt (ADR)
- b. Commercial paper
- c. Shares in a mutual fund
- d. Corporate bond

Ans: d

Difficulty: Easy

Ref: Fixed-Income Securities

- 36. Which of the following characteristics is true of municipal bonds?
- a. They general have higher rates than corporate bonds of equal risk.
- b. Capital gains on municipal bonds are exempt from federal taxation.
- c. They pay interest income that is exempt from federal taxation.
- d. They are default free.

Ans: c

Difficulty: Easy Ref: Types of Bonds

- 37. Which of the following is a money market security that has a weak secondary market?
- a. preferred stock
- b. banker's acceptance
- c. repurchase agreement
- d. commercial paper

Ans: d

Difficulty: Moderate

Ref: Money Market Securities

- 38. Which of the following is a money market security that pays income that is exempt from state and local income taxes?
- a. municipal bond
- b. repurchase agreement
- c. banker's acceptance
- d. T-bill

Ans: d

Difficulty: Moderate

Ref: Money Market Securities

- 39. TL Bank is planning to purchase a T-bill with a \$100,000 face value. The T-bill is quoted at a bank discount of 2.2% and has 300 days to maturity. What is the T-bill's bond equivalent yield (BEY)?
- a. 2.21%
- b. 2.23%
- c. 2.25%
- d. 2.27%

Ans: d

Difficulty: Moderate

Ref: Money Market Securities

- 40. Which of the following is a money market security that is insured by the FDIC?
- a. Commercial paper
- b. Banker's acceptance
- c. Certificate of deposit
- d. T-bill

Ans: c

Difficulty: Easy

Ref: Money Market Securities

- 41. Ted is considering a State of Nebraska bond that pays 3.40% and a comparable risk bond issued by Verizon that pays 5.25%. Ted is in the 37% marginal tax bracket. Relative to the Verizon bond, Ted should conclude that the taxable equivalent yield (TEY) on the Nebraska bond is approximately:
- a. 9 basis points higher.
- b. 15 basis points higher.
- c. 9 basis points lower.
- d. 15 basis points lower.

Ans: b

Difficulty: Moderate Ref: Types of Bonds

- 42. The money market security that sells with the lowest denomination is a:
- a. negotiable CD and the amount is \$100,000.
- b. municipal bond and the amount is \$1,000.
- c. repurchase agreement and the amount is \$5,000.
- d. T-bill and the amount is \$10,000.

Ans: d

Difficulty: Moderate

Ref: Money Market Securities

- 43. TR Bank is planning to purchase a T-bill with a \$100,000 face value. The T-bill is quoted at a bank discount of 2.1% and has 220 days to maturity. What is the T-bill's effective annual yield (EAY)?
- a. 2.15%
- b. 2.17%
- c. 2.19%
- d. 2.21%

Ans: b

Difficulty: Difficult

Ref: Money Market Securities

- 44. Relative to venture capital funds, buyout funds tend to rely:
- a. more heavily on debt and they are riskier.
- b. more heavily on debt and they are less risky.
- c. less heavily on debt and they are riskier.
- d. less heavily on debt and they are less risky.

Ans: b

Difficulty: Difficult Ref: Private Equity

True-False Questions

1. Direct investing involves trades made by directly purchasing shares of a financial intermediary.

Ans: False

Difficulty: Moderate

Ref: Organizing Financial Assets

2. An example of indirect investing would be buying shares in a mutual fund.

Ans: True

Difficulty: Easy

Ref: Organizing Financial Assets

3. Nonmarketable investments would include savings accounts at banks and Treasury bills.

Ans: False

Difficulty: Moderate

Ref: Nonmarketable Financial Assets

4. Marketable securities all fall into the category of capital market securities.

Ans: False

Difficulty: Moderate

Ref: Nonmarketable Financial Assets

30. Bond investors typically pay more for a bond than its quoted price.

Ans: True Difficulty: Easy

Short-Answer Questions

1. Distinguish between direct and indirect investing.

Answer: Direct investing – buy bonds and stocks; Indirect investing – buy mutual

funds, contribute to pension plans, buy life insurance policies.

Difficulty: Easy

Ref: Organizing Financial Assets

2. Compare the cash flows an investor expects from coupon bonds, zero-coupon bonds, and preferred stock.

Answer: Coupon bonds – annuity of interest payments plus lump sum of

principal at maturity

Zero-coupon bonds – principal at maturity

Preferred stock – annuity ad infinitum (perpetuity)

Difficulty: Moderate

Ref: Fixed-Income Securities

3. How is the earnings retention rate related to the dividend payout rate?

Answer: Earnings retention rate = 1 - dividend payout rate

Difficulty: Moderate

Ref: Equity Securities

4. How is the total book value of equity affected by stock splits?

Answer: Stock splits do not affect total value of equity or the individual

accounts, other than the number of shares outstanding and the par value.

Difficulty: Moderate

Ref: Equity Securities

5. In what sense is a stock selling for 12 times earnings "cheaper" than a stock with a P/E ratio of 20?

Answer: If a stock is trading at 12 times earnings, it is cheaper than the one trading

at 20 times earnings in the sense investors get \$1 of earnings for only a

\$12 investment in buying the stock.

Difficulty: Moderate

Ref: Equity Securities

6. What are two direct and one indirect method for individuals to invest in foreign stocks?

Answer: Buy securities directly through exchanges or as American depository

receipts and indirectly through mutual funds.

Difficulty: Moderate

Ref: Organizing Financial Assets, Equity Securities

7. Explain how writing option contracts (both puts and calls) can generate income for owners of the underlying stock.

Answer: The writer keeps the option premium regardless of whether or not the

option is exercised.

Difficulty: Moderate

Ref: Derivative Securities

8. Rank (lowest to highest) the following securities in terms of the risk-expected return tradeoff from the investors' viewpoint: common stock, corporate bonds, U.S. Treasury bonds, preferred stock.

Answer: U.S. Treasury bonds, corporate bonds, preferred stock, common stock

Difficulty: Moderate

Ref: Fixed-Income Securities, Equity Securities

9. What are some advantages of asset-backed securities to investors?

Answer: High yields with manageable risk.

Difficulty: Moderate

Ref: Fixed-Income Securities

10. Who benefits from a futures contract, a call contract, and a put contract, if prices fall?

Answer: The seller of the futures contract, the writer of the call contract, and the

buyer of the put contract.

Difficult: Moderate

Ref: Derivative Securities

11. Does the options market help stabilize or destabilize the stock market? Explain.

Answer: Options should be a stabilizing force if options are used to hedge stock

positions. Options might be destabilizing if used for speculation.

Difficulty: Difficult

Ref: Equity Securities, Derivative Securities

12. How do asset-backed securities improve the flow of funds from savers to borrowers?

Answer: Asset-backed securities can be sold to a broader market of investors than

the underlying securities.

Difficulty: Moderate

Problems

1. What rate would a taxable corporate bond have to pay to be comparable to a municipal bond with a coupon rate of 7 percent if the investor is in the 28 percent tax bracket?

Answer: Taxable equivalent yield is 0.07/(1-0.28) = 9.72%

Difficulty: Easy

Ref: Fixed-Income Securities

2. A corporate investor in the 34% marginal income tax bracket can buy bonds issued by a petroleum exploration company yielding 10.606%. The investor should be willing to buy tax-exempt municipal bonds of similar quality yielding what percent or higher?

Answer: 10.606 x (1.0-0.34) = 7.00 percent

Difficulty: Easy

Ref: Fixed-Income Securities

3. The par value of Blaze, Inc. common stock is \$0.50, the earnings per share is \$4, the stock price is \$60, and the dividend per share is \$1. Calculate the dividend yield and P/E ratio.

Answer: Dividend yield = 1/\$60 = 0.0167 = 1.67%

P/E ratio = \$60/\$4 = 15

Difficulty: Moderate

Ref: Equity Securities

4. The par value of Blaze, Inc. common stock is \$0.50, the earnings per share is \$4, the stock price is \$60, and the dividend per share is \$1. Calculate the dividend payout ratio and the firm's retention ratio (plowback ratio).

Answer: Payout rate = 1/4 = 0.25 = 25%

Retention ratio = 1 - payout ratio = 1 - 0.25 = 75%

Difficulty: Moderate

Ref: Equity Securities

5. The par value of Inferno, Inc. common stock is \$0.50, the earnings per share is \$6, and it trades at a P/E of 15. What is Inferno, Inc.'s stock price?

Answer: Stock price is EPS x P/E = $$6 \times 15 = 90

Difficulty: Moderate

Ref: Equity Securities

6. Carl purchased a \$10,000 T-bill that had 260 days to maturity and was quoted with a bank discount of 1.6%. After holding the T-bill for 200 days, Carl sold the T-bill when it had a quoted bank discount of 2.0%. Find Carl's bond equivalent yield (BEY) and his equivalent annual yield.

Answer: Buying Price: $10,000 \times [1 - 0.016 \times (260/360)] = 9,884.444$

Selling Price: $10,000 \times [1 - 0.020 \times (60/360)] = 9,966.666$

Return $_{BEY} = [(9,966.67 - 9,884.44)/9,884.44 \times (365/200)] = 1.518\%$

Return EAY = $[(1 + (9,966.67 - 9,884.44)/9,884.44)^{365/200} = 1.523\%$

Difficulty: Difficult

Ref: Money Market Securities

7. TR Bank is planning to purchase a T-bill with a face value of \$100,000. The T-bill is quoted at a bank discount of 2.1% and has 320 days to maturity. Find the T-bill's price, bond equivalent yield (BEY) and equivalent annual yield (EAY).

Answer: Price: 100,000 x [1-0.021 x (320/360)] = \$98,133.33

Return $_{\text{BEY}} = [(100,000 - 98,133.33)/98,133.33 \text{ x } (365/320)] = 2.140\%$

Return EAY = $[1 + (100,000 - 98,133.33)/98,133.33]^{365/320} = 2.173\%$

Difficulty: Moderate

Ref: Money Market Securities

8. Bond's issued by McDonalds are yielding 6.75%, whereas comparable risk bonds issued by the city of Omaha are yield 4.45%. What Nebraska residents should purchase the Omaha bonds?

Answer: Find the tax rate that makes the after-tax bond returns equal.

$$4.45 = 6.75 \text{ x } (1 - t)$$
; solve for t $t = 0.3407 \text{ or } 34.07\%$

Therefore, Nebraska residents with tax rates above 34.07% should purchase the city of Omaha bonds.

Difficulty: Moderate
