Chapter 2 Atomic Structure and Radi	<u>oisotopes</u>	
1. What is a micronutrient?a. an element required at only certainb. an essential element needed in quec. an essential element needed in qued. a nonessential element, useful in second	antities less than 10 g/day antities less than 100 mg/day	
e. nutrients needed in large quantitie	•	
ANSWER: c		
 2. What is a common symptom of ioding a. weak bones and teeth b. enlarged thyroid c. anemia d. slow wound healing e. All of these are common symptor 		
ANSWER: b		
 3 is an important component of heatigue and shortness of breath results. a. Iodine b. Fluorine c. Zinc d. Iron e. Oxygen ANSWER: d	emoglobin. Without this protein, tis	ssues become starved of oxygen, and
 4 is most commonly ingested alor a. Iodine b. Fluorine c. Zinc d. Iron e. Oxygen ANSWER: a	ng with salt.	
5. Adding to drinking water is a confidence decrease dental cavities. a. iodine b. fluorine c. zinc d. iron e. oxygen ANSWER: b	ommon practice in many cities, mea	ant to strengthen tooth enamel and

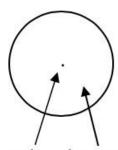

Name:______Class:_____

Chapter 2 Atomic Structure and Radioisotopes

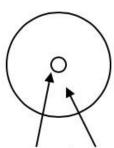

- 6. _____ is an important component of the immune system as well as required by many enzymes.
 - a. Iodine
 - b. Fluorine
 - c. Zinc
 - d. Iron
 - e. Oxygen

ANSWER: c

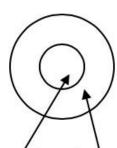

7. Which diagram of an atom BEST represents the scale of the nucleus and electrons?

nucleus electrons

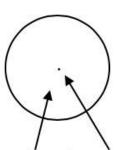

nucleus electrons h.

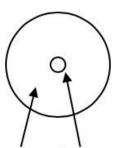

nucleus electrons

C.

nucleus electrons nucleus electrons d.

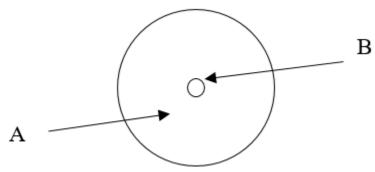

e.

a.

- a. a.
- b.b.
- c. c.
- d. d.
- e. e.

ANSWER: a

8. According to the current model of the atom, the part of the diagram labeled A is made up of

- a. protons.
- b. neutrons.
- c. electrons.
- d. protons and neutrons.

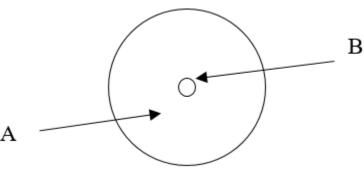

Name:	Class:	Date:

Chapter 2 Atomic Structure and Radioisotopes

e. protons, neutrons, and electrons.

ANSWER: c

9. According to the current model of the atom, the part of the diagram labeled B is made up of

- a. protons.
- b. neutrons.
- c. electrons.
- d. protons and neutrons.
- e. protons, neutrons, and electrons.

ANSWER: d

- 10. Which statement about the model of the atom is TRUE?
 - a. The nucleus is much less dense than the surrounding electrons.
 - b. Electrons orbit the nucleus like planets around the Sun.
 - c. This is the first model of the atom.
 - d. The atom is mostly empty space.
 - e. The model of the atom was developed by looking directly at an atom.

ANSWER: d

- 11. Which statement about the model of the atom is TRUE?
 - a. Protons and neutrons are evenly distributed throughout the atom.
 - b. Electrons can be directly observed.
 - c. Electrons are now known to orbit the nucleus like a planet orbits the Sun.
 - d. The path of a single electron can now be followed exactly.
 - e. We can determine the probability of finding an electron in a region of space.

ANSWER: e

- 12. The nucleus is composed of _____.
 - a. protons
 - b. neutrons
 - c. electrons
 - d. protons and neutrons

Name:	Class:	Date:
Chapter 2 Atomic Structure and Radiois	sotopes	
e. protons, neutrons, and electrons		
ANSWER: d		
13 have a negative charge.		
a. Protons		
b. Neutrons		
c. Electrons		
d. Protons and neutrons		
e. Protons, neutrons, and electrons		
ANSWER: c		
14 have a positive charge.		
a. Protons		
b. Neutrons		
c. Electrons		
d. Protons and neutrons		
e. Protons, neutrons, and electrons		
ANSWER: a		
15 are neutral.		
a. Protons		
b. Neutrons		
c. Electrons		
d. Protons and neutrons		
e. Protons, neutrons, and electrons		
ANSWER: b		
16 are the subatomic particles that l	nave the smallest mass.	
a. Protons		
b. Neutrons		
c. Electrons		
d. Protons and neutrons		
e. Protons, neutrons, and electrons		
ANSWER: c		
17 have a mass of approximately 1	amii	
a. Protons	will.	
b. Neutrons		
c. Electrons		
d. Protons and neutrons		

Name: Class:	
Chapter 2 Atomic Structure and Radioisotopes	
ANSWER: d	
 18. The identity of an element is determined by its number of a. protons b. neutrons c. electrons d. protons and neutrons e. protons, neutrons, and electrons 	
ANSWER: a	
 19. Which pair correctly matches an element to its atomic number? a. 9.012 – Be b. 12.01 – C c. 39.94 – Ar d. 9 – F e. 133 – Cs ANSWER: d	
 20. Which pair does NOT correctly match an element symbol to its full not a. C – carbon b. O – oxygen c. H – helium d. N – nitrogen e. Cl – chlorine ANSWER: c	ame?
 21. Isotopes are elements with the same number of a. electrons but different numbers of protons. b. protons but different numbers of electrons. c. electrons but different numbers of neutrons. d. protons but different numbers of neutrons. e. neutrons but different numbers of protons. ANSWER: d 	
 22. Which of the following is NOT true for the atoms ¹²C, ¹³C, and ¹⁴C? a. They all have six electrons. b. They all have the same mass number. c. They all have the same atomic number. 	

e. They all have six protons.

d. They are isotopes.

Date:_____

Chapter 2 Atomic Structure and Radioisotopes

ANSWER: b

- 23. Radioactive isotopes are
 - a. very stable isotopes.
 - b. highly chemically reactive.
 - c. unstable isotopes.
 - d. charged species.
 - e. unusually nonreactive.

ANSWER: c

24. Select the choice in which atomic number, mass number, number of neutrons, and number of protons listed is correct for phosphorous-32.

	Atomic number	Mass number	Number of neutrons	Number of protons
a.	15	32	32	15
b.	15	32	17	15
c.	17	15	15	17
d.	17	32	32	17
e.	16	32	16	16

- a. choice a
- b. choice b
- c. choice c
- d. choice d
- e. choice e

ANSWER: b

- 25. Which of the following elements exists as an isotope with a mass number of 35 and an atomic number of 17?
 - a. chlorine
 - b. bromine
 - c. argon
 - d. tellurium
 - e. sulfur-35

ANSWER: a

- 26. Which of the following is NOT the same for different isotopes of the same element?
 - a. atomic number
 - b. number of protons
 - c. number of electrons

Name. Gass. Date.	Name:	Class:	Date:
-------------------	-------	--------	-------

Chapter 2 Atomic Structure and Radioisotopes

- d. charge
- e. mass number

ANSWER: e

27. Which isotope of zirconium is the lightest?

	Isotope	Natural abundance
A	⁹⁰ Zr	52%
В	⁹¹ Zr	11%
С	⁹² Zr	17%
D	⁹⁴ Zr	17%
Е	⁹⁶ Zr	3%

- a. choice A
- b. choice B
- c. choice C
- d. choice D
- e. choice E

ANSWER: a

28. Which isotope of zirconium is the LEAST abundant?

	Isotope	Natural abundance
A	90 Zr	52%
В	⁹¹ Zr	11%
С	⁹² Zr	17%
D	⁹⁴ Zr	17%
Е	⁹⁶ Zr	3%

- a. choice A
- b. choice B
- c. choice C
- d. choice D
- e. choice E

ANSWER: e

29. Which isotope of Zirconium has the fewest number of neutrons?

	Isotope	Natural abundance
A	90 Zr	52%
В	⁹¹ Zr	11%

Name: _____ Class: ____ Date: ____

Chapter 2 Atomic Structure and Radioisotopes

C	⁹² Zr	17%
D	⁹⁴ Zr	17%
Е	⁹⁶ Zr	3%

- a. choice A
- b. choice B
- c. choice C
- d. choice D
- e. choice E

ANSWER: a

30. The average atomic mass of zirconium is

	Isotope	Natural abundance
A	⁹⁰ Zr	52%
В	⁹¹ Zr	11%
С	⁹² Zr	17%
D	⁹⁴ Zr	17%
Е	⁹⁶ Zr	3%

- a. less than 90 because the atomic mass only depends on the number of protons in the atom.
- b. 90 because ⁹⁰Zn has the highest natural abundance.
- c. greater than 90 but less than 96 because the atomic mass takes into account the abundance of all naturally occurring isotopes.
- d. 96 because the atomic mass is the mass of the highest naturally occurring isotope.
- e. greater than 96 because the atomic mass is the sum of masses of the naturally occurring isotopes.

ANSWER: c

- 31. Which of the following statements about isotopes is FALSE?
 - a. Isotopes are atoms with the same number of protons but different numbers of neutrons.
 - b. Most elements naturally have more than one isotope.
 - c. Isotopes are atoms with the same atomic number but different mass numbers.
 - d. An isotope with more neutrons will have a greater mass than an isotope with fewer neutrons.
 - e. Isotopes are present in equal quantities.

ANSWER: e

32. An atom of carbon containing seven neutrons can be written as

 13 C 12 C carbon-13 carbon-12 C-12 C-14 II III IV V VI

a. All of the choices are correct for writing carbon.

Chapter 2 Atomic Structure and Rad	<u>ioisotopes</u>	
47. An element is a solid at room tempe electricity and temperature, and it is also		
a. oxygen		r
b. lithium		
c. helium		
d. antimony		
e. iron		
ANSWER: d		
48. Which of the following terms is NO a. malleable	T a characteristic of a metal?	
b. a good conductor of heat		
c. a good conductor of electricity		
d. shiny		
e. a gas at room temperature		
ANSWER: e		
49. The number of protons is equal to the a. number of neutrons	ne in a neutral atom.	
b. number of electrons		
c. mass number		
d. average atomic mass		
e. group number		
ANSWER: b		
50. What is the atomic number of eleme $_{25}^{56}X$	ent X?	
a. 25		
b. 56		
c. 81		
d. 31		
e. None of the above values is the a	tomic number.	
ANSWER: a		
51. What is the mass number of elemen	t X?	
⁵⁶ ₂₅ X		
a. 25		
b. 56		
c. 81		

Name:	Class:	Date:
Chapter 2 Atomic Structure and Rad		
d. 31		
e. None of the above values is the r	nass number.	
ANSWER: b		
52. How many electrons are in a neutra	l atom of element X?	
⁵⁶ ₂₅ X		
a. 25		
b. 56		
c. 81		
d. 31		
e. None of the above values is the r	number of electrons.	
ANSWER: a		
53. What is the identity of element X?		
⁵⁶ ₂₅ X		
a. xenon		
b. manganese		
c. gold		
d. copper		
e. iron		
ANSWER: b		
54 make up the majority of com	pounds found in living organisms.	
a. Building-block elements		
b. Macronutrients		
c. Micronutrients		
d. Metals		
e. Metalloids		
ANSWER: a		
55. Most of the micronutrients are		
a. transition metals.		
b. metalloids.		
c. nonmetals.		
d. alkali earth metals.		

e. noble gases.

ANSWER: a

Name: Class: Date:

Chapter 2 Atomic Structure and Radioisotopes

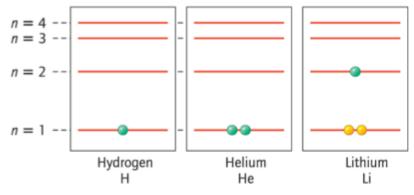

- 56. Micro- and macronutrients are
 - a. equally distributed throughout the body.
 - b. all metals and metalloids.
 - c. obtained through the diet.
 - d. only found in the first three periods of the periodic table.
 - e. all required in quantities of more than 100 mg per day.

ANSWER: c

- 57. Which of the following is NOT a building block element?
 - a. C
 - b. H
 - c. O
 - d. N
 - e. These are all building block elements.

ANSWER: e

58. Which atom has the largest diameter?

- a. H
- b. He
- c. H and He
- d. Li
- e. All of the above have the same diameter.

ANSWER: d

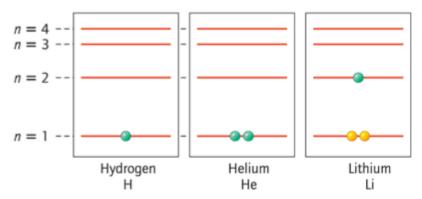

- 59. _____ determine the physical and chemical characteristics of an atom.
 - a. Protons
 - b. Neutrons
 - c. Electrons
 - d. Protons and neutrons
 - e. Protons, neutrons, and electrons

ANSWER: c

Name: Class: Date:

Chapter 2 Atomic Structure and Radioisotopes

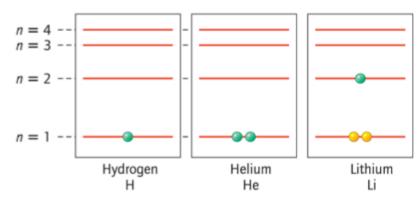

60. Which electron energy level is closest to the nucleus of the atom?

- a. n = 1
- b. n = 2
- c. n = 3
- d. n = 4
- e. All electrons are equally close to the nucleus.

ANSWER: a

61. Which electron energy level is lowest in energy?

- a. n = 1
- b. n = 2
- c. n = 3
- d. n = 4
- e. All electrons are equal in energy.

ANSWER: a

- 62. According to the periodic table, how many energy levels do the elements in the third row have?
 - a. 1
 - b. 2
 - c. 3
 - d. 4

Name:	Class:	Date:
Name.	Class.	Daic.

Chapter 2 Atomic Structure and Radioisotopes

e. It depends on the specific element.

ANSWER: c

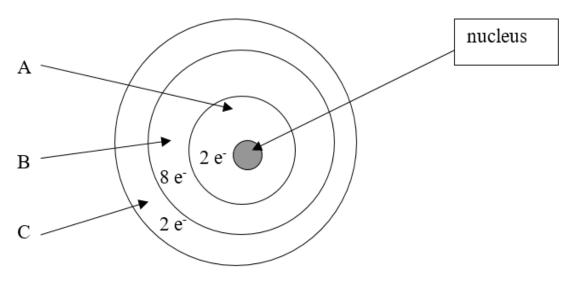

- 63. According to the periodic table, how many valence electrons do the elements in the third row have?
 - a. 3
 - b. 4
 - c. 5
 - d. 8
 - e. It depends on the specific element.

ANSWER: e

- 64. According to the periodic table, how many valence electrons do the elements in group 7A have?
 - a. 5
 - b. 6
 - c. 7
 - d. 8
 - e. It depends on the specific element.

ANSWER: c

65. Which element is depicted in this drawing of a neutral atom?

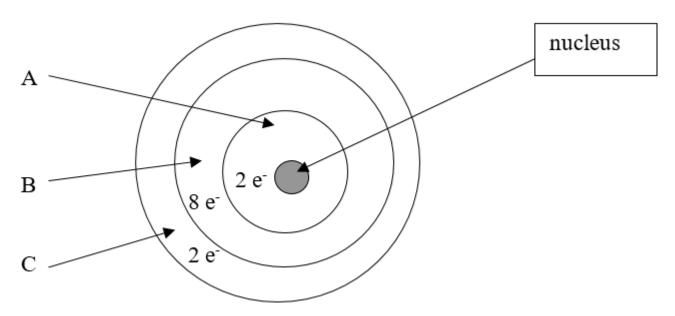

- a. beryllium
- b. magnesium
- c. oxygen
- d. neon
- e. calcium

ANSWER: b

66. Which energy level is the valence energy level?

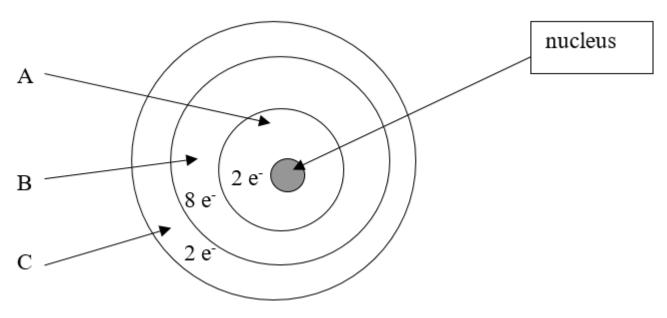

Chapter 2 Atomic Structure and Radioisotopes

- a. energy level A
- b. energy level B
- c. energy level C
- d. energy levels A and B
- e. energy levels B and C

ANSWER: c

67. How many electrons are in the valence energy level?

- a. 12
- b. 10
- c. 8

Name: Clas	ss: Date:	•
------------	-----------	---

Chapter 2 Atomic Structure and Radioisotopes

d. 4

e. 2

ANSWER: e

68. The element chlorine has three electron energy levels. How many electrons are in each level?

	n=1	n=2	n=3
a.	2	8	8
b.	2	8	18
c.	7	8	2
d.	2	8	7
e.	8	8	1

- a. choice a
- b. choice b
- c. choice c
- d. choice d
- e. choice e

ANSWER: d

- 69. Electron energy levels closest to the nucleus are occupied before electron energy levels farther from the nucleus because the electron energy levels closest to the nucleus are
 - a. pulled toward the nucleus by gravity.
 - b. protected by the outer shell.
 - c. attracted to the nucleus for reasons unknown.
 - d. more stable than electrons farther from the nucleus.
 - e. Actually, electrons farther from the nucleus are filled first.

ANSWER: d

- 70. The size of atoms generally increases as the number of
 - a. electron energy levels increases.
 - b. electrons in the valence energy level increases.
 - c. neutrons in atoms increases.
 - d. protons increases.
 - e. All atoms are the same size.

ANSWER: a

- 71. Which element would you expect to be the largest?
 - a. fluorine
 - b. chlorine
 - c. argon
 - d. calcium

Name:	Class:	Date:
Chapter 2 Atomic Structure and	Radioisotopes	
e. hydrogen		
ANSWER: d		
72. Radioactive decay is the proces	ss by which	
a. radioisotopes become more	-	
b. radioisotopes emit radiation.		
c. radioisotopes emit high-ener	gy particles and/or electromagnetic radiati	on.
d. an element of one type can o	change to an element of another type.	
e. All of the above are correct	about radioactive decay.	
ANSWER: e		
73. The process in which a nucleus a. fusion.	spontaneously breaks down by emitting ra	adiation is known as
b. fission.		
c. a chain reaction.		
d. reaction.		
e. radioactive decay.		
ANSWER: e		
74. The symbol $_{2}^{4}\alpha$ is used to represent	ant o(n)	
	sent a(n)	
a. proton.b. alpha particle.		
c. gamma ray.		
d. beta particle.		
e. neutron.		
ANSWER: b		
75. How is an alpha particle differe	ant from an atom of halium?	
a. It's not different at all.	an atom of henum:	
b. It has a different number of	protons	
c. It has a different number of		
d. It has a different number of		
	er of electrons and a different number of pr	cotons.
ANSWER: d	r	
76. The radioisotope undergoing do	ecay is often called the	
a. reactant.	•	
b. product.		
c. parent nuclide.		

d. decayer.

Name: Class: Date:	
--------------------	--

Chapter 2 Atomic Structure and Radioisotopes

e. daughter nuclide.

ANSWER: c

- 77. A nuclear equation is balanced when the _____ is equal on both sides of the equation.
 - a. identity of the atoms
 - b. charges on the atoms
 - c. identity of the radioactive particles
 - d. sum of the atomic numbers
 - e. sum of the atomic and mass numbers

ANSWER: e

- 78. What type of radiation is emitted when U-235 undergoes radioactive decay? $^{235}_{92}\text{U} \rightarrow ^{231}_{90}\text{Th} + ?$
 - a. alpha particle
 - b. beta particle
 - c. positron
 - d. gamma ray
 - e. x-ray

ANSWER: a

- 79. Which of the following indicates that an alpha particle has been released during radioactive decay of an atom?
 - a. The identity of the atom does not change.
 - b. The mass number of the atom decreases by 4.
 - c. The atomic number of the atom increases by 1
 - d. The atomic number of the atom decreases by 1.
 - e. The atomic number of the atom decreases by 4.

ANSWER: b

80. In which of the following reactions is the missing particle an alpha particle?

a.
$${}^{137\text{m}}_{56}$$
Ba $\rightarrow {}^{137}_{56}$ Ba + ?

b.
$${}^{13}_{7}\text{N} \rightarrow {}^{13}_{6}\text{C} + ?$$

c.
$${}^{141}_{58}\text{Ce} \rightarrow {}^{141}_{59}\text{Pr} + ?$$

d.
$$^{232}_{90}$$
Th $\rightarrow ^{228}_{88}$ Ra +?

e. All of these are examples of alpha decay.

ANSWER: d

- 81. The product from the alpha decay of radon-222 is
 - a. polonium-218.

Name:	Classi	Doto
name.	Class:	Date:

Chapter 2 Atomic Structure and Radioisotopes

- b. radium-226.
- c. polonium-226.
- d. radium-218.
- e. lead-220.

ANSWER: a

- 82. How is a beta particle different from an electron?
 - a. They are the same.
 - b. A beta particle has higher energy than a regular electron
 - c. A regular electron has higher energy than a beta particle.
 - d. A beta particle is positively charged.
 - e. A beta particle is positively charged and higher in energy than a regular electron.

ANSWER: b

83. Which nuclear reaction releases a beta particle?

a.
$${}^{137\text{m}}_{56}\text{Ba} \rightarrow {}^{137}_{56}\text{Ba} + ?$$

b.
$${}^{13}_{7}N \rightarrow {}^{13}_{6}C + ?$$

c.
$${}^{141}_{58}\text{Ce} \rightarrow {}^{141}_{59}\text{Pr} + ?$$

d.
$$^{235}_{92}U \rightarrow ^{231}_{90}Th + ?$$

e. All of these are examples of beta decay.

ANSWER: c

- 84. In a balanced nuclear reaction, which statement is consistent with the release of a beta particle?
 - a. The identity of the atom does not change.
 - b. All radioactive decay releases a beta particle.
 - c. The mass number decreases by 4.
 - d. The atomic number increases by 1.
 - e. The atomic number decreases by 1.

ANSWER: d

85. What is the identity of the missing daughter nuclide in the following nuclear reaction?

$$^{12}_{5}B \rightarrow ? + ^{0}_{1}\beta$$

- a. beryllium-11
- b. beryllium-12
- c. beryllium-13
- d. carbon-12
- e. carbon-13

ANSWER: d

Name:	Class:	Date:
Chapter 2 Atomic Structure and Ra		
-	pic sample of a radioisotope to decay to	o one-half its original activity is
known as the		
a. reaction rate.		
b. kinetics.		
c. half-life.		
d. lifetime.		
e. decay rate.		
ANSWER: c		
87. Radioisotopes used in medicine ty describes the reason for this?	ypically have short half-lives. Which o	f the following statements BEST
a. It minimizes the harmful side e	effects of the radiation.	
b. They are the isotopes that are t	he easiest to make.	
c. These radioisotopes occur natu	rally.	
d. Only small amounts of them ar	-	
e. These radioisotopes emit the co	orrect type of radioactive particle.	
ANSWER: a		
88. Which of the following radioisoto a. barium-131 (half-life = 11.6 da	ope would be LEAST likely to be used ays)	in a medical application?
b. iodine-131 (half-life = 8 days)		
c. technecium-99m (half-life = 6	hours)	
d. plutonium-239 (half-life = 2.4	$\times 10^4$ years)	
e. fluorine-18 (109 minutes)	• ,	
ANSWER: d		
	ety of medical applications. It has a ha AM, how many milligrams are still acti	_
a. 100.0 mg		
b. 50.0 mg		
c. 25.0 mg		
d. 10.0 mg		
e. 5.00 mg		
ANSWER: c		
00 7 11 4041 1 10110 22 2	** 1.10**	S 24.1
a. 1 half-life	vs. How many half-lives have passed at	fter 24 days?
b. 2 half-lives		

c. 3 half-livesd. 4 half-lives

Name: Class: Date:

Chapter 2 Atomic Structure and Radioisotopes

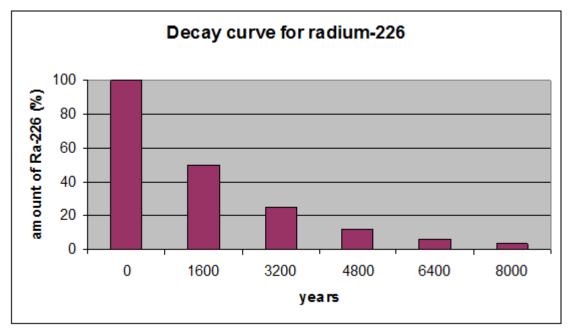

e. 5 half-lives

ANSWER: c

- 91. Carbon-11 has a half-life of 20 minutes. Which of the following equations is used to calculate the amount of carbon-11 remaining after 1 hour if the starting material is a 100-mg sample?
 - a. $100 \text{ mg} \times \frac{1}{2}$
 - b. 100 mg/3
 - c. 100 mg/20
 - d. 100 mg/20/20/20
 - e. $100 \text{ mg} \times \frac{1}{2} \times \frac{1}{2} \times \frac{1}{2}$

ANSWER: e

92. According to the graph, what is the half-life in years of ²²⁶Ra?

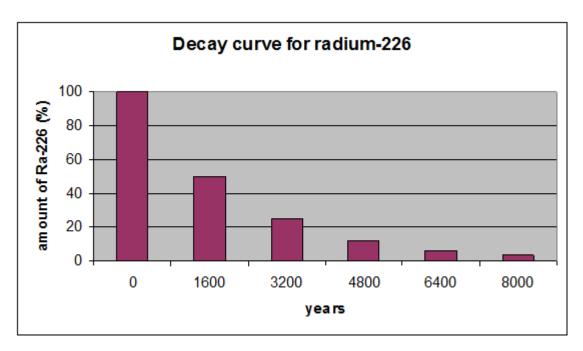

- a. 8,000 years
- b. 6,400 years
- c. 4,800 years
- d. 3,200 years
- e. 1,600 years

ANSWER: e

93. According the graph, what percent of radium-226 remains after three half-lives?

Name: Class: Date:

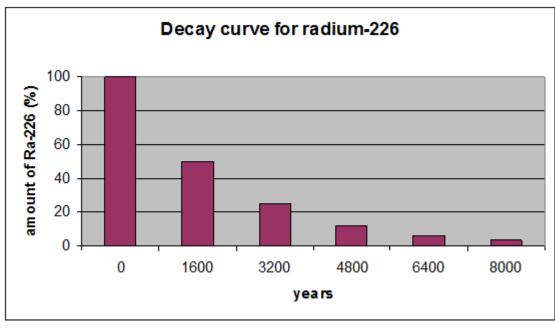

Chapter 2 Atomic Structure and Radioisotopes

- a. 100%
- b. 50%
- c. 25%
- d. 12.5%
- e. 6.25%

ANSWER: d

94. According to the graph, radioactive decay is a(n) _____ in radioactivity as a function of time.

a. linear decrease

Name:	Class:	Date:
Chapter 2 Atomic Structure and Rad	<u>ioisotopes</u>	
b. linear increase		
c. exponential decrease		
d. exponential increase		
e. random decrease		
ANSWER: c		
95. Phosphorous-32 is a beta emitter wi		
decayed to 25 mg. Which statement BE	ST describes where the rest of the ³²	² P went?
a. It disappeared.		
b. It reacted with air.		
c. It turned into sulfur and a beta pa	article.	
d. It turned into silicon and a beta p	article.	
e. It decomposed into beta particles		
ANSWER: c		
96. An atom in a metastable state is		
a. unusually low in energy.		
b. unusually stable.		
c. very unreactive.		
d. high in energy.		
e. emittable.		
ANSWER: d		
97. Which of the following is NOT a ty	pe of radiation that comes from the	decay of radioisotopes?
a. microwaves		
b. gamma rays		
c. alpha particle		
d. beta particle		
ANSWER: a		
98. What fraction of the electromagnetic	c spectrum is visible to humans?	
a. about two-thirds		
b. half		
c. about one-quarter		
d. a very small fraction		
e. none		
ANSWER: d		
99. Which of the following colors has the	ne lowest energy?	
a. red		

b. orange

Name: ______ Class: _____ Date: _____

Chapter 2 Atomic Structure and Radioisotopes

- c. yellow
- d. green
- e. blue

ANSWER: a

100. What is the relationship between the energy and the wavelength of light?

- a. They are proportional.
- b. They are inversely proportional.
- c. As one increases, so does the other, but not in a linear way.
- d. As one increases, the other decreases, but not in a predictable way.
- e. They are unrelated in any way.

ANSWER: b

101. Which of the following changes when gamma radiation is released?

- a. atomic number
- b. number of protons
- c. number of electrons
- d. number of neutrons
- e. energy of the isotope

ANSWER: e

102. In which of the following nuclear reactions is only gamma radiation released?

a.
$${}^{137\text{m}}_{56}$$
Ba $\rightarrow {}^{137}_{56}$ Ba + ?

b.
$${}^{13}_{7}N \rightarrow {}^{13}_{6}C + ?$$

c.
$${}^{141}_{58}\text{Ce} \rightarrow {}^{141}_{59}\text{Pr} + ?$$

d.
$$^{235}_{92}U \rightarrow ^{231}_{90}Th + ?$$

e. All of these reactions probably release gamma radiation.

ANSWER: a

103. In a balanced nuclear reaction, which of the following is consistent with the release of a gamma particle?

- a. The identity of the atom does not change.
- b. All radioactive decay releases gamma radiation.
- c. The mass number decreases by 4.
- d. The atomic number increases by 1.
- e. The atomic number decreases by 1.

ANSWER: a

104. What is the most penetrating electromagnetic radiation?

a. radio waves

CLICK HERE TO ACCESS THE FULL TEST BANK			
Name:	Class:	Date:	
Chapter 2 Atomic Structure and Rad	<u>ioisotopes</u>		
b. microwaves c. gamma rays d. visible light e. ultraviolet rays ANSWER: c			
105. Which is the BEST definition of the a. This is radiation that has enough a b. This is the radiation that is released. This is any electromagnetic radiated. This is any nuclear or electromagnetic radiated. This is any long-wavelength electromagnetic radiated. This is any long-wavelength electromagnetic radiated.	energy to dislodge a valence electroned during a nuclear reaction. tion. netic radiation.	on from an atom.	
106. How is an atom in the body changea. It becomes positively charged.b. It becomes negatively charged.c. It becomes a new isotope.d. It becomes a new element.	ed once it is hit with ionizing radiat	ion?	

- e. It falls apart.

ANSWER: a

- 107. How is ionizing radiation damaging to the body?
 - a. It can cause DNA damage.
 - b. It can cause gene mutations.
 - c. It can cause cell death.
 - d. It can cause radiation sickness.
 - e. All of the above are correct about ionizing radiation damage to the body.

ANSWER: e

- 108. Which of the following types of radiation can be stopped by light clothing?
 - a. beta particles
 - b. alpha particles
 - c. gamma rays
 - d. x-rays
 - e. All of the above radiation can be stopped by light clothing.

ANSWER: b

- 109. Which statement BEST describes why alpha particles are not frequently used in medical applications?
 - a. Their half-lives are too long.
 - b. They can do too much damage at close range.

Name:	Class:	Date:
_		

Chapter 2 Atomic Structure and Radioisotopes

- c. They are difficult to transport.
- d. They require too much shielding.
- e. Their penetrating power is too great.

ANSWER: b

- 110. What sort of protection should be used when working with gamma emitters?
 - a. a lead shield
 - b. heavy clothing
 - c. a sheet of aluminum
 - d. a very thick slab of concrete
 - e. None is needed at all because they are not very penetrating.

ANSWER: a

- 111. Which of the following does NOT need to be considered when determining what sort of protection against ionizing radiation must be used?
 - a. type of ionizing radiation
 - b. energy of the radiation
 - c. duration of contact with the ionizing radiation
 - d. penetrating power of the ionizing radiation
 - e. All of the above should be considered.

ANSWER: e

- 112. Why is it necessary to shield yourself from gamma radiation and beta and alpha particles but not from radio waves or microwaves?
 - a. Radio waves and microwaves do not have much penetrating power.
 - b. Radio waves and microwaves are lower in energy, so they are not ionizing.
 - c. Radio waves and microwaves are higher in energy, so they pass through the body without adverse effect.
 - d. Radio waves and microwaves are not electromagnetic radiation.
 - e. Gamma radiation and beta and alpha particles are not ionizing.

ANSWER: b

- 113. Which of the following describes a benefit of using Sieverts instead of grays to measure the quantity of radiation that a patient has received?
 - a. Sieverts measure the biological effect of radiation, not just quantity.
 - b. Grays measure the biological effect of radiation, not just quantity.
 - c. Sieverts measure the amount of energy absorbed, not just quantity.
 - d. Grays measure the amount of energy absorbed, not just quantity.
 - e. There is no benefit.

ANSWER: a

Copyright Macmillan Learning. Powered by Cognero.

Name:	Class:	Date:
-------	--------	-------

Chapter 2 Atomic Structure and Radioisotopes

- 114. Effective dose measurements take into account the _____ of a type of radiation.
 - a. energy
 - b. penetrating ability
 - c. biological effect
 - d. quantity
 - e. All of the above are taken into account for the effective dose measurement.

ANSWER: e

115. Which statement BEST interprets the statement below?

The LD50 for radiation is an acute dose of 3–4 Sv.

- a. Exposure to 50 mg of a radiation source will result in radiation poisoning.
- b. Exposure to 50 mg of a radiation source will result in death.
- c. Fifty percent of people exposed to this dose will get sick within one month of the exposure.
- d. Fifty percent of people exposed to this dose will die within one month of the exposure.
- e. 4 to 6 Sv is the maximum dose that 50% of people can undergo without long-term injury.

ANSWER: d

116. What sort of information do the units used in this table take into account?

Symptoms
None
Temporary decrease in white blood cell count.
Headache and increased risk of infection.
Possible temporary male sterility.
LD ₁₀ ; nausea, hair loss, fatigue. Loss of white
blood cells; temporary male sterility.
LD ₃₅ ; loss of hair all over the body, fatigue and general illness. High risk of infection.
LD ₅₀ uncontrollable bleeding in the mouth.
Permanent sterility in women.
LD ₆₀ ; death resulting from internal bleeding and infection. Permanent female sterility.
LD ₁₀₀ ; death after 14 days.

- a. energy of the radiation
- b. penetrating ability of the radiation
- c. quality factor of the radiation
- d. quantity of the radiation
- e. All of the above are taken into account.

ANSWER: e

117. What is the minimum dosage in which people are observed to die from radiation sickness?

Name: Class: Date:

Chapter 2 Atomic Structure and Radioisotopes

Effective Dose (Sv)	Symptoms
0.05-0.2	None
0.2-0.5	Temporary decrease in white blood cell count.
0.5-1.0	Headache and increased risk of infection. Possible temporary male sterility.
1.0-2.0	LD ₁₀ ; nausea, hair loss, fatigue. Loss of white blood cells; temporary male sterility.
2-3	LD ₃₅ ; loss of hair all over the body, fatigue and general illness. High risk of infection.
3-4	LD ₅₀ , uncontrollable bleeding in the mouth. Permanent sterility in women.
4-6	LD ₆₀ death resulting from internal bleeding and infection. Permanent female sterility.
6-10	LD ₁₀₀ ; death after 14 days.
a. 0.2–0.5 Sv	
b. 0.5–1.0 Sv	
c. 1.0–2.0 Sv	
d. 2–3 Sv	
e. 3–4 Sv	

ANSWER: c

- 118. Which of the following choices describes an acute dose of radiation?
 - a. the dose that an x-ray technician receives over the course of her career
 - b. the dose that a scientist receives while working with radioactive materials for a multiyear research project
 - c. the annual dose that a pilot is exposed to
 - d. the dose that is received by handling a highly radioactive source
 - e. the annual dose that we all receive as a result of background radiation

ANSWER: d

- 119. How does computed tomography (CT) differ from standard x-ray imaging?
 - a. CT scans involve software as well as x-ray imaging.
 - b. CT scans use an array of detectors.
 - c. CT scans are 3D; X-rays are 2D.
 - d. All of the above list how CT scans differ from x-ray imaging.

ANSWER: d

- 120. The figure below is an example of which imaging technique(s)?
- I. x-ray
- II. computed tomography

Name:	Class:	Date:
-------	--------	-------

Chapter 2 Atomic Structure and Radioisotopes

- © David Frazier/Corbis
- a. I only
- b. II only
- c. I and II
- d. neither I nor II
- e. This figure could be any of these imaging techniques.

ANSWER: a

- 121. Which of the imaging technique(s) listed below is harmless to the patient?
 - I. x-ray
 - II. computed tomography
 - a. I only
 - b. II only
 - c. I and II
 - d. neither I nor II

ANSWER: d

- 122. Which of the method(s) of imaging listed below produces three-dimensional images?
 - I. x-ray
 - II. computed tomography
 - a. I only
 - b. II only
 - c. I and II
 - d. neither I nor II

ANSWER: b

- 123. Which of the method(s) of imaging listed below uses x-rays?
 - I. x-ray
 - II. computed tomography
 - a. I only
 - b. II only
